

MICROSAFE®

FEATURES

- ✓ Flexible installation of sensor 45-70 cm above hob.
- ✓ Triple safety: time, temperature and tamper.
- ✓ Fast, simple installation.
- ✓ Just one button = easy to use.
- ✓ Turns cooker off automatically if hob overheats.
- ✓ Timer can be set to 15-360 min.
- ✓ Can be expanded with accessories for additional safety as required.

**Microsafe® mKomfy 25R,
wireless cooker guard**

The cooker guard is a safety product that monitors your hob/cooker.

It performs a dual safety function: timer function and overheating guard plus tamper protection.

The mKomfy consists of two modules: a cooker guard sensor (which goes on the wall above the cooker) and a cooker socket for connecting the hob.

TIP Also available with a cabled sensor. See the separate product sheet.

ACCESSORIES

6251616
**Reset
button**

6251647
**Master
switch**

6251642
**Smoke
shut-off**

The cooker guard sensor goes on the wall above the cooker with wireless communication to the cooker socket.

The cooker socket replaces a traditional socket. The hob is connected directly to it.

PART NO.	NAME	COLOUR
